Change advisory notice 288 Spatial Upgrade of Multiple Vicmap Products

What is happening

We will start integrating the outputs of the Digital Cadastre Modernisation spatial upgrade into Vicmap Products in October 2022.

The integration will happen on a Local Government Area (LGA) basis. It is expected that the integration work will be completed within a week.

During the integration week, all data maintenance in the affected LGA will be suspended. This will facilitate the upload of the spatially upgraded data into Vicmap and therefore no new maintenance data will appear in the Vicmap Data supplies for that week in the respective LGA.

In the week following the completion of the spatial upgrade normal data maintenance will resume. The Vicmap team will then catch up the previous week's non processed maintenance documents for the affected LGA.

The LGA spatial upgrade schedule is provided in Table 2 below. Whilst we expect to deliver according to this schedule, please note the schedule is subject to change, based on operational requirements.

Vicmap Planning layers will be updated to align with the improved Vicmap spatial data following the adjustment.

Please note: There will not be two versions of Vicmap data. Once the corrected data is integrated to Vicmap, that will be the only version of Vicmap data maintained and available to customers.

Why this change is occurring

Land Use Victoria is undertaking a spatial upgrade to Vicmap Property and all Vicmap products that either align to or are constrained by the parcel alignments. This spatial upgrade will deliver to Vicmap customers an improved, digitally driven and enhanced spatial data service.

A [Vicmap Special Bulletin](#) dated 23 March 2022 announced these forthcoming changes and Vicmap Change Notice [#272](#) announced the data model changes to accommodate the spatial upgrade.

Who will it affect

- This change will affect all users of Vicmap data sets that are either aligned to or are constrained by the parcel alignments. Any customers with data that aligns to the parcel fabric for the State needs to be aware changes will be taking place progressively LGA by LGA according to the schedule.
- Anyone who uses Incremental Update File (IUF) data supply format will, at some stage during the next 16 months, encounter a larger than normal incremental files for the LGAs in their area of interest.

The spatial adjustment will affect the following Vicmap products:

Vicmap Product	Vicmap Tables
Vicmap Address	Address Points
Vicmap Admin	Local Government Area, Locality, Parish, Postcode and Township
Vicmap Crown Land Tenure	Tenure and Government Road
Vicmap Features of Interest (Fol)	Fol Line and Fol Area
Vicmap Hydro	Water Channels
Vicmap Index	Framework Boundary
Vicmap Property	Parcel, Property, Road Casement, Easement, Annotation, CAD Area Bdy, CAD Point and CAD Line
Vicmap Transport	Airport Area, Railway and Road
