Amendment notes

This amendment explains the revision of Vicmap Change Notice #288.2 published 13/10/2022.

1. Revised integration dates and additional resources available as interim support to customers.

The revised Vicmap Change Advisory Notice #288.3 is provided below.

What is happening

Vicmap customers will already be aware that the Digital Cadastre Modernisation (DCM) Program has moved into the integration phase, where we are spatially upgrading Vicmap with the adjusted parcel data. The data integration work is progressing, and we anticipate the completion of data integration for the first four LGAs by 14 November 2022.

This change notice provides an updated Vicmap integration schedule until 12 December 2022.

Additionally, the last version of Vicmap data for an LGA, before the DCM integration takes place, will be made available for customers. The Department is making this unmaintained data available as interim support for customers who may not be ready to transition to the upgraded Vicmap data.

The pre-integration data for the first LGA, Hobsons Bay City Council, is available [here](#):

Please be aware that this pre-integration data is a snapshot in time, and as such, is not maintained by Vicmap.

Please follow [this link](#) for more information on the improvements to Vicmap data accuracy.

Why this change is occurring

We are updating the Vicmap integration schedule whilst balancing operational requirements and our regular data maintenance program. We aim to provide customers adequate time and resources to prepare for the forthcoming integration.
